PROJECTS

Project Name — *Quick caller*

Worked with the team to develop an android app called Quick caller. The app is for educational institutes where in case of emergency regarding students, the teachers or any other responsible personnel can quickly get details such as guardian number, address, blood group etc.

Role:

- Helped with the design of the application.
- Helped with the front-end Development of the application.

Technology Used:

- Adobe XD
- Android Studio

Project Name — *Travel Buddy*

As part of a college project I developed an android application that recommends a user a travel plan using a recommendation engine.

Role:

- Designed, Developed and implemented by myself as it was an individual project.

Technology Used:

- Adobe XD
- Android Studio
- Firebase

Project Name — *Personal Web Portfolio*

My own web portfolio which I designed and developed.

Technology Used:

- HTML
- CSS
- Bootstrap
- Sass
- Github

SKILLS

Technical Skills:
